

Days of the Week printable Wheels

These printable wheels make it easy to talk about the Spanish days of the week. The days are on the outside wheel, and the inside wheel helps kids talk about them relative to *hoy*. There are two versions of the inner wheel. One has *ayer*, *hoy* and *mañana* and the other adds the verbs.

Kids just cut out the wheels and use a metal brad to join them at the center. Of course, if you have more time, or want a project to do at home, kids can easily make their own wheels with paper plates or any cardboard circles. They can write in the words and color the different sections. You can also print these wheels on light-colored card stock and kids can color those.

Using the wheels, kids can answer the questions *¿Qué día es hoy?* *¿Qué día es mañana?* and *¿Qué día fue ayer?* They can also answer questions like *¿Qué día viene antes del sábado?*
